I'm sure that can be accomplished with FW 3 if you have the money for it. With this method you will get the BW in your VST out of the box.. I guess you are going to have to spend some money up front for StudioLinkedVST. Why we are different The music industry is wide open right now and there are more music lovers than ever before. One of the results of this is that there are more and more artists and companies trying to create a way to get music out to the world. I founded ReverbNation to create a better way for musicians to connect with each other and get the word out about their work. We believed that the current way that music is distributed was broken. There are so many people trying to get their music heard, but for the most part it is in the hands of just a few companies. Also, everyone is talking about sharing and promoting their music and there is no one really helping musicians do that. We want to create a better environment for musicians to get their music heard. ReverbNation is about community. We believe in helping musicians connect and share. Instead of artists losing money to fake or unlicensed services, we want to offer them the platform to get the word out. Many of the artists we have featured on our site are now household names because of the power of the network behind ReverbNation. You can reach millions of listeners on ReverbNation. For the musicians, we create a way to get the word out about their music, build their audience and sell their music. Our

plan from the start has been to offer the features that other music networks are offering but without all the extra fluff. We are trying to find a balance between everything 1cb139a0ed
