

IP Camera CCTV Calculator (formerly CCTVCAD Calculator) Crack + Free [32/64bit] (Final 2022)

IP Camera CCTV Calculator is an advanced network bandwidth and storage space calculator for IP CCTV design. The tool is able to calculate network traffic streamed by IP cameras and video encoders and disk space needed for storing video archives during a custom time. User interface The layout may seem a bit overwhelming at a first glance but this is only because the utility comes packed with many dedicated parameters. If you want to find out more about the program's features, you can check out the built-in help manual. The app lets you create multiple projects and manually input camera data or import camera list from VideoCAD project file or from VideoCAD app installed on the same computer. Calculations IP Camera CCTV Calculator gives you the freedom to carry out calculations for cameras that generate up to three simultaneous streams, such as viewing, recording, and alarm recording with different compression, resolution, frame rate, and recording time. When dealing with storage space calculation, you should specify the expected recording time, alarm time, as well as storage time. As soon as you have finished with configuring the dedicated parameters, the tool displays the following data: sum of viewing, recording, and alarm recording traffic of all cameras, sum of traffic of all streams, as well as required disk space. Exporting options and other handy features The generated table can be printed or exported to TXT, CSV, HTML, RTF, or XLS file format. Additionally, you can copy, paste, import cells and rows within the table and in/to MS Excel, perform search operations, filter cameras by different criteria, show and hide columns, change table's width and height, and freeze columns. An overall efficient calculator To sum things up, IP Camera CCTV Calculator proves to be a reliable application that comprises several handy features for calculating video bandwidth and storage space, and is suitable especially for advanced users. IP Camera CCTV Calculator (formerly CCTVCAD Calculator)

Description: IP Camera CCTV Calculator is an advanced network bandwidth and storage space calculator for IP CCTV design. The tool is able to calculate network traffic streamed by IP cameras and video encoders and disk space needed for storing video archives during a custom time. User interface The layout may seem a bit overwhelming at a first glance but this is only because the utility comes packed with many dedicated parameters.
